REMARKS

This is UNEVALUATED Information

On 29 July 1954, only one parked biplane was observed at Altengrabow-Gross Luebars airfield and it was parked in the northeastern corner of the field. A small earth bunker was seen at the northwestern corner of the installation which presumably housed a guard detail. Four soldiers whose service color could not be identified were seen there. Local residents did not know of any temporary occupation by jet aircraft at the field. Moreover, the installation apparently was not large enough for take-offs or landings by MiG-15s.

25X1

Comment. The report agrees with available information that Altengrabow-Gross Luebars airfield is not suitable for utilization by jet aircraft. Biplanes which are used as AAA target representations land at the field.
